“Comfort furnishings” is a website that is connected to a searchable database of products. Users will be able to register for an account to proceed to his transactions according to each category which are displayed on its respective page. Users and site visitors will also be able to use the search box to type in a specific product that they want and see all the results of every products in the database which contains that subcategory. In addition, they should be able to add and delete products in their shopping cart. Other feature of the site is that they could change the number of the products they want automatically in their shopping Cart and get the total results straight, instead of go back and add that same product. In definitive, it is an e-commerce site that will have an admin session and users sessions. It will help each one to purchase.

## CREATIVE BRIEF

Name of the site: “ Comfort Furnishings”

Main Idea of Site: Create a database to buy, and choose eachone ’s favorite Furniture.

Features: Users will register / login to their account in order to choose their favorite furniture. Also, they will be able to log out from their account and change their user information (user-name, password, email address). The purpose of this site will be to make people able to login, buy , choose their favorite Furnitures. They could also leave their comment. In addition, it will have a search engine to help anyone finding whatever they’re looking for. Last, they could add or remove furnitures from their page.

Admin user will be able to create and delete user accounts and view and remove users saved furnitures. (Admin will be a level 10 user.)

User Login: (index.php on right sidebar)

Enter: User name, password (PHP asks database if the name is there)

If Yes, check database that password is also correct

## INDEX

If Yes, username and password are correct, log the user in

If No, tell user password does not match

If No, Error, tell user information is incorrect, please try again

Register for New Account: (Takes user to registration area – maybe make it a pop up)

Enter: User name, password and email address (PHP asks database if the name is already taken)

If Yes, tell user name is taken, try again

If No, submit username, password, email and level to database.

Backend: set user level to 1 (non-admin user)

Take user to products.php

User's Products Page:( products.php)

PHP get their "username" and display a welcome message

PHP fill in each category number with the number of products they saved there

User clicks a title: (PHP asks database to display all information for this category as a list by id number).

User clicks “Remove”: PHP gets product id and removes it from the users list,  
Updates the number for that category

User uses search box: products will be displayed in the main area(PHP searches products table for results that contain the word the user entered)

If YES- Display the products with”Add” link

If NO- error message “Sorry, your search produced no results”

User clicks “Add”: PHP gets product id and user id and adds product id to users list, updates the number for the category that matches user id

User clicks “Edit Info”: PHP gets user id and displays form with current Information. The user can edit the information and resubmit, or cancel. PHP write over previous information with new entries for this user Id

Admin login: (index.php in footer)

Enter:User name, password (PHP asks database if the name is there)

If YES- Check database that password is correct and level is 10)

If YES- log the user in

If NO- tell user “You do not have admin privileges”

If NO- Error, tell user” Information is incorrect, please try again”

## CREATIVE BRIEF

Admin clicks “Edit My Info”: same as regular user

Admin clicks ”Edit User Info”: PHP diaplays list of users with the links  
“Edit Info” and “View products”

If “Edit Info” is selected – Display all user info as form, resubmit or cancel

If “View Recipes is selected – Display all user products as list with “Remove” links next to each one.

The Hosting will be used with PHP and MySQL ;

Other technologies to be used will be J- query, javascript, html and css.

The departments:

Home , login,register, logout, Products (Kitchen, Bedroom, Living Room), price and link will be added underneat each products that the user want to chose. May be later onr ratings .

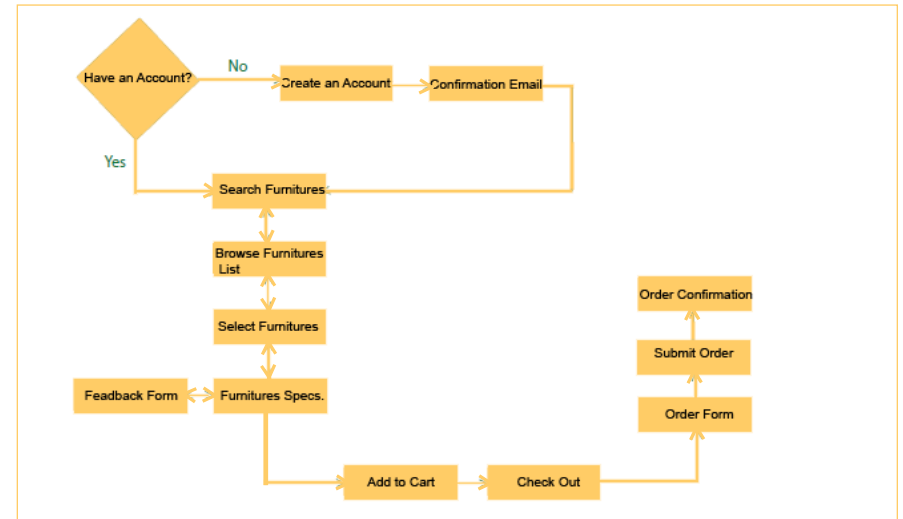

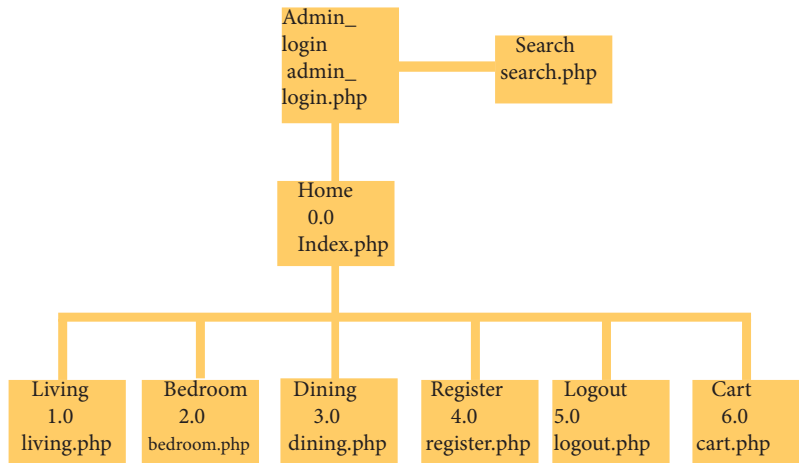

Personas:

Primary audience: All furniture buyers.

Secondary audience: Youth older than 15 years old and adults

Perception tone: Exciting, enjoyable, helpfull
